Welcome to Sikeston/Miner, Missouri

HISTORY OF SIKESTON

Established in 1860 by John Sikes, Sikeston was located on the El Camino Real. Sometimes called the King's Highway, El Camino Real was the main overland route from St. Louis to New Orleans. The location was also the site of the terminus of two main railroads of the area. Lumbering, the rich farmland and good railroad facilities helped Sikeston grow rapidly and become one of the largest shipping centers in the state.

In 1904 the Little River Drainage District was formed to drain much of the land around Sikeston and surrounding territory. This helped to establish Sikeston as one of the richest farm areas in the entire state of Missouri. Farm products grown in the area include: soybeans, cotton, corn, milo, wheat, potatoes, watermelons and other vegetables. The area also supports a variety of livestock farms.

The central location of Sikeston in America has played a very important role in a number of industries locating in the area. Two major interstate highways, I-55 and I-57, plus U.S. Highways 60, 61 and 62 help move products from the area to locations all over America. A river port on the Mississippi River is located only a few miles to the north of Sikeston. This has opened the door to international trade for the entire area.
