

This program has been approved for 1 recertification credit hour toward PHR, SPHR and GPHR recertification through the Human Resource Certification Institute (HRCI). Please be sure to note the program ID number on your recertification application form. For more information about certification or recertification, please visit the HRCI homepage at www.hrci.org.

Dear Chamber Members

Join Manpower on Wednesday, June 18 from **12 – 1 p.m. EDT; 11 a.m. – 12 p.m. CDT; 10 a.m. – 11 a.m. MDT; 9 a.m. – 10 a.m. PDT**, as we host a complimentary webinar entitled – **Hazard Communication: Avoid Becoming another OSHA Statistic.**

OSHA's Hazard Communication Standard has been around for almost 20 years, but continues to be one of the most heavily cited. Why do so many employers receive citations on the HazCom standard? What is it about the HazCom standard that trips employers up?

Start talking about OSHA's HazCom standard and people's eyes usually glaze over. HazCom is seen as some incomprehensible, document-heavy mandate that requires you to put colorful little labels on containers and keep unreadable pages of technical data in your workplace. During our June 18th webinar Robert Ernst, associate editor with J.J. Keller, will provide you with real-world examples of what OSHA is looking for and discuss simple, yet critical, steps you can take to be sure that you are meeting the requirements of the standard.

After participating in this webinar, you will have a better understanding of:

- Why Hazard Communication Standard continues to be one of the most heavily cited OSHA standards
- The essentials of a written HazCom program, and what trips employers up
- HazCom training requirements, especially regarding contract workers
- How the Globally Harmonized System for Classification and Labeling of Hazardous Chemicals will affect your workplace
- Tips for keeping all of your employees safe from chemicals hazards
- Handy checklist to make sure that you don't overlook any critical HazCom issues
